**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 09/832,709	<b>Applicant(s)</b> WILLIAMS ET AL.	
	<b>Examiner</b> Jacqueline F. Stephens	<b>Art Unit</b> 3761	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 06 April 2009.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/6/09 has been entered.

### ***Response to Arguments***

2. Applicant's arguments with respect to claims 1, 3, 5-7, 20-23, 27, and 32-34 are considered persuasive. Arguments with respect to claims 26, and 31 are not persuasive. Applicant argues Hirschman does not teach a malodor counteractant disposed between an inner and outer layer. However, the Examiner has identified layer 14 as an inner layer and layer 11/12 as an outer layer. Hirschman teaches the malodor counteractant is disposed in the inner layer 14. However, as seen below, the inner layer has two sides. A malodor counteractant disposed on side A would be between the inner layer side B and the outer layer 11.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

Art Unit: 3761

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 26 and 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hirschman USPN 3690321 in view of Bernardin and further in view of Petrus et al. USPN 5417224. Hirschman teaches a tampon having an inner layer 14 having one or more malodor counteractant materials incorporated therein (col. 2, lines 35-37); and at least one outer layer 11/12 that provides a cross-pad configuration to the fibrous tampon (Figures 1, 3, and 5). The one or more malodor counteractant materials is selected from the claimed materials (col. 2, lines 35-37, specifically deodorizing active or masking agent). Hirschman does not teach the malodor counteractant contains ascorbic acid or its derivatives. Hirschman teaches the deodorizing agent is in a viscous form (col. 2, line 39).

Hirschman teaches the present invention substantially as claimed. However, Hirschman does not teach the malodor counteractant material is glycerin. Petrus discloses a tampon having glycerin and pectin as a malodor counteractant material (col. 6, lines 37-52). It would have been obvious to one having ordinary skill in the art to modify the malodor counteractant material of Hirschman with glycerin as taught in Petrus. Petrus discloses the glycerin as a lubricant, however it is additionally capable of absorbing odors as taught in Yabrov (col. 4, lines 41-43). Additionally it is old and well known that glycerin and pectin are natural substances.

***Allowable Subject Matter***

6. Claim 1, 3, 5-7, 20-22, 27, and 34 are allowed.

Claims 32 and 33 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jacqueline F. Stephens whose telephone number is (571) 272-4937. The examiner can normally be reached on Monday-Friday 9:00-5:30.
